- Applies to designated Case Lot items.

Retail Profit: Two Simple Ways

First: Earn more by hosting your own “store.” Keep a desired amount of product on hand, sell directly to your customers and keep the profits. Set your own price or follow our suggested retail pricing.

Second: Direct customers simply set up a FREE Retail Account under your Distributorship. They purchase, we fill the order. Your profit is determined by the amount difference between Oxyfresh’s suggested retail price and the Active Distributor price – minus 10% of the retail order total (for order and payment processing fees).

Rank Qualifications & Monthly Referral Commissions

	Auto Order OR Individual Sales	Minimum monthly Organizational Total Sales (TS)	1st - Certified ¹ on Distributors with \$500 or more IS	1st - Not Certified	2nd	3rd	4th	5th	6th	7th

- For Directors and above, no more than 50 percent of the Total Sales requirements may come from one leg.
- Referral Commissions are compressed. Sales on each level are calculated based on who is Active in the specific month. Inactive Distributors **DO NOT** “take up” a level. Those who are Active move up to fill those level sales for that particular month.

Becoming a Certified Distributor

1. Distributors must complete and submit the online certification form for approval (located at Oxyfresh.com/Events).
2. Upon approval, you must attend a Certification Course.
3. Once a Distributor enrolls for a Certification Course, their certification commissions and bonuses are held until the class is completed¹.

Benefits:

Qualifies you to receive the 40% Clinical Trial Bonus, 40% First Large Order Bonus as well as the 10% Referral Commissions on your 1st Level Distributors with Individual Sales that are \$500 or more.

Footnotes:

¹ If a Distributor is currently enrolled in a Certification Course, their 1st Level Referral Commissions, 40% Clinical Trial Bonus, and 40% Large Order Bonus are held until class is fully completed. No more than 3 months will be banked prior to completion of certification.
