

Help the animals you love smell, look and even hear better.

Taking care of the one you love is easy — with Oxyfresh Pet Products.

Ask yourself three things:

1. If my pets don't come when they're called, can I be sure they're really hearing me?

Dirt and wax accumulation in the outer ear and ear canal might be the problem. This buildup can lead to infections and discomfort for your pet. If your pets are rubbing or scratching their ears regularly then get close to them and have a look. Oxyfresh Pet Ear Cleaner with Oxygene® will gently loosen dirt and wax from your pet's ear with a solution that is both soothing and deodorizing. Pet Ear Cleaner #420 (4 oz.)*

2. When was the last time someone told me that my pet smelled great?

Just by following their own sense of adventure, your pets can attract and hold on to odd smells. With this Oxygene® spray, you can remove those odors from cages, furniture, litter boxes, carpets, curtains and bedding. This amazing product will generate compliments for your pet and you. Pet Deodorizer #400 (16 oz.)*

3. What the best way to clean my pet's coat?

You need a cleansing shampoo that is also deodorizing. At Oxyfresh, we recommend a pH-balanced, conditioning formula that doesn't put harsh chemicals on someone who is a member of your family. Oxyfresh Pet Shampoo is a scientific blend of ingredients that effectively cleans and conditions your pet's coat. Pet Shampoo #401 (8 oz.)*

"The Oxyfresh Pet Ear Cleaner is the best ear cleaner I have ever used in the 15 years I have been a veterinarian. I like the fact that it is gentle and non-irritating, is odorless and deodorizes the ear. And it does a wonderful job cleaning out all the wax and discharge."
