

Her fresh breath could mean a longer life.

Did you know that your pet's breath might also be an indicator of overall health?

It is estimated that 80 percent of dogs and 70 percent of cats over the age of three suffer from periodontal disease – a serious deterioration of the gums and supporting bones of the teeth. Yes, it will give your pet bad breath, but left unchecked, the bacteria that cause this disease can enter the bloodstream, causing infection to vital organs. Research indicates that proper oral health may extend the life of your pet by two to five years!

The Oxyfresh Pet Oral Hygiene System is safe, effective and easy to use:

**Pet Oral Hygiene Solution**

A tasteless, odorless solution formulated to promote healthy gum tissue and eliminate breath odors for your pet. #455 (4 oz.) or #456 (16 oz.)  
4 oz. Pump Sprayer #940 sold separately

**Pet Gel**

Our most versatile pet product. This odorless and tasteless gel can be used orally or externally to soothe, cleanse and deodorize. #405 (4 oz.)

**Triple • Pet Toothbrush**

Uniquely designed (triple-headed) to help prevent periodontal disease by removing plaque as it accumulates on the tooth surface. #410 (single)

**Pet Oral Hygiene**  
with Oxygene®

*"My wife and I own seven cats and a dog. We use the Oxyfresh Pet Oral Hygiene Solution in their drinking water and their breath is always kissing sweet. I have also noticed that their teeth are much cleaner as well. As a veterinarian, I see many pets that can benefit from the Oxyfresh Pet Oral Hygiene program."*
