

Is your pet stressed?

**Your pet gives you unconditional love.
Doesn't he deserve protection against stress?**

Our pets live in the same stressful world we do. Of course, it's more difficult to understand the dynamics of a stressed out cat or dog — after all, we're only human. But pet stress is real and its impacts can be potentially harmful.

Fortunately, Oxyfresh delivers an effective, non-toxic anti-stress formula that works at the cellular level to protect your pet from the damaging effects of stress. **Primorye Pet™** uses seven **rare adaptogens**, plus trace minerals and other proven health-boosting nutrients and antioxidants including Aloe Vera, Green Tea, Pau d'Arco, trace minerals, and sea vegetables to strengthen your pet's natural defenses, normalize cell functions and maximize physical endurance.

Scientifically proven to fight off the potentially damaging impacts of stress, **Primorye Pet™** is every bit as powerful as Oxyfresh's Primorye for humans and can easily be mixed into your pet's food. The seven adaptogens in **Primorye Pet™** meet the three criteria for adaptogens:

- The plant must be completely safe and non-toxic to the body.
- The action it exerts must help return unhealthy cells to a healthy state.
- It must assist the body in adapting to internal and external stressors.

Recommended Daily Use:

Dogs and cats under 10 lbs. — 1 tsp.

Dogs and cats over 10 lbs. — 1 tsp per 10 lbs., 1/2 oz. per 30 lbs., 1 oz. per 60 lbs.

Avians, exotics and small pets — 1mL per 100 grams.

Horses — 1 oz. per 800 lbs.

***Primorye Pet™** is available in a 16-ounce bottle (stock #478)*

PRIMORYE PET™

“Mental focus and top physical shape are a must for an award-winning agility dog. Every time Luz performs, he gives his all. His active body craves Primorye Pet, which also keeps his immune system strong and his mind sharp.”
