

## Lemon Mint Power Paste

---

This formula contains a unique combination of Oxygene® and zinc for an even more powerful deodorizing effect. Zinc, which is pharmacologically safe and effective in oral health products, removes odor-causing volatile organic compounds (VOCs). Research has shown that the combination of Oxygene® and zinc helps to remove more of the different kinds of molecules that cause oral malodor, making it extremely effective in eliminating bad breath.

### Unique formula

This is a gentle, low-abrasion formula that contains no sodium lauryl sulfate (foaming agent), making it a perfect choice for electric toothbrush users. This formula is naturally flavored using a unique blend of essential oils (lemon, orange, grapefruit, bergamot, lime, peppermint) and Xylitol. Xylitol is a natural sweetener, found in many fruits and vegetables, and has been shown to inhibit the formation of plaque as well as the bacteria implicated in tooth decay. A zesty lemon-mint flavor stimulates healthy salivary flow providing essential moisture for the tissues along with a great taste.

- SLS free
- Low-abrasion
- Freshens breath using Oxygene®
- Zinc acetate for maximum breath protection
- Contains Xylitol
- Saccharin-free
- Super concentrated - lasts up to 4 times longer
- Unique blend of essential oils

### A Clearly Confident Smile!

Oxyfresh has carefully formulated three unique professional-grade, super-concentrated toothpastes. They last up to four times longer than commercial brands. Oxyfresh toothpastes are specifically designed to contain no artificial flavorings or colorings and are all low-abrasion formulas — preserving precious tooth enamel, root surfaces, dental restorations and cosmetic enhancements.

## Secret weapon in fighting bad breath

All three formulas contain the exclusive proprietary ingredient, Oxygene®, which safely and completely destroys bad breath at its source! Oxygene® literally dissolves odor-causing microorganisms by attacking volatile sulfur compounds (VSCs), neutralizing their odorous by-products and the harmful effect they have in the mouth. Research has demonstrated a strong association between halitosis and periodontal disease due to the presence and damage caused by VSCs. By wiping out VSCs, you can count on longer lasting fresh breath protection and a healthier mouth. Oxyfresh's Oxygene®-based toothpastes have formed a solid foundation for high-quality, cutting-edge oral health care products that will support any daily hygiene program while fighting fight halitosis.

## Ingredients

---

Sorbitol, Water, Hydrated Silica, Glycerin, Sodium Methyl Cocoyl Taurate, Natural Flavor, Xylitol, Sodium Chlorite (Oxygene® - Stabilized Chlorine Dioxide), Zinc Acetate, Sucralose, Chondrus Crispus (Carrageenan)
